Office Action Summary

Application No.

09/707,770

Applicant(s)

CHENG ET AL.

Examiner

Jinsong Hu

Art Unit

2154

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 April 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-105 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 1-105 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, 33-46 and 58-73, drawn to a system and method for retrieving content from a web server by a mobile device via a secure connection, classified in class 705, subclass 64.
 - II. Claims 16-22, 47-57 and 74-81, drawn to a system and method for communicating among a client, a proxy server and an origin web server via URL connection, classified in class 709, subclass 219.
 - III. Claims 23-32 and 82-92, drawn to a system and method for reformatting a required content on a proxy server before the content being sent to a mobile device, classified in class 709, subclass 230.
 - IV. Claims 93-95 and 100-102, drawn to a system for retrieving content from a content server through a proxy server by a mobile device via a secure connection, classified in class 707, subclass 10.

- V. Claims 96-99 and 103-105, drawn to a system for communicating among a client, a proxy server and a content server via URL connection, classified in class 707, subclass 103 X.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are disclosed as different combinations which are not connected in design, operation or effect. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01).

In the instant case, invention I is directed to a method comprises the step of transmitting the required content on a web server to the mobile device through a proxy server via a secure connection . The invention II is directed to a method comprises the step of providing a URL to connect a mobile device to an origin web server via a proxy server. The invention III is directed to a method comprises the steps of adding meta tag information and specific attribute to a web page, removing specific tag and attribute form a web page, inserting text and changing format etc. The invention IV is directed to a method comprises the step of generating a user request from a mobile device to the proxy server for the content which resides on a content server. The invention V is directed to a method comprises the step of providing a URL to connect a mobile device to a content server via a proxy server.

3. These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the four inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

(a) the Group I search (claims 1-15, 33-46 and 58-73) would require use of search **Class 705, subclass 64**.

(b) the Group II search (claims 16-22, 47-57 and 74-81) would require use of search **Class 709, subclass 203**.

(c) the Group III search (claims 23-32 and 82-92) would require use of search **Class 709, subclass 230**.

(d) the Group IV search (claims 93-95 and 100-102) would require use of search **Class 707, subclass 10**.

(e) the Group IV search (claims 96-99 and 103-105) would require use of search **Class 707, subclass 103 X**.

4. A telephone call was made to Mr. Ashok K. Mannava (Reg. No. 45,301) on February 12, 2004 to address a possibility of restriction requirement, but did not result in an oral election being made.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

5. Applicant is reminded that the required for response to this requirement is 30 days, not one month.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinsong Hu whose telephone number is (703) 306 – 5932.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John A. Follansbee, can be reached on (703) 305-8498. The fax number for Group 2100 is (703) 872-9306.

Any inquiry of a general nature or relating to the status of the application should be directed to the Group receptionist at (703) 305-3900.

Jinsong Hu
